# Secure Password

---

Features and Characteristics

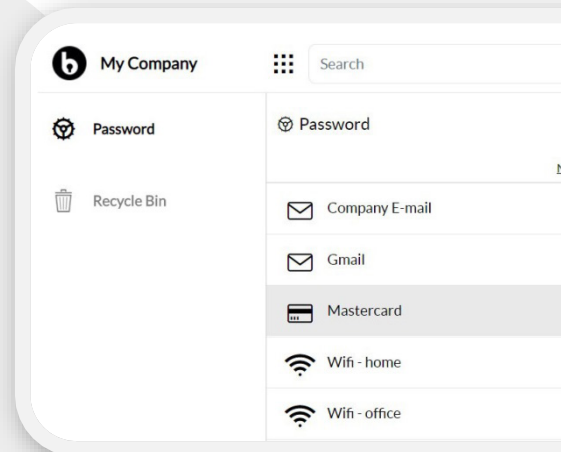

# Secure Password

Secure Password allows you to have a secure “vault,” where you can save access passwords or other sensitive information related to important documents (driver’s license, insurance, credit cards, etc...) and their digital copies.

In this app, you have specific templates available for every need and, with each of them, you can automatically generate complex passwords.

Starting from: **2,90 € month/license** (min 5 licenses), 1TB included

## The most important features

- **AES 256-bit encryption**

All the files and information that you upload and/or create within Secure Password are automatically encrypted with an AES 256-bit encryption key.

- **Dedicated templates**

You can create a new record using one of the preset templates made available by your company in which all the fields you need are provided.

- **Automatic protection and organization**

The files and information found within this application are automatically encrypted and can be organized using the appropriate

dedicated template for each type of file and data.

- **Complex password creation**

For each service whose credentials you want to retain, Secure Password can generate a complex password and save it for future use at your request.

- **Native apps for iOS & Android**

You can access/edit the records within your repository, even from your mobile phone, thanks to the dedicated mobile Apps for iOS and Android.

# Use cases

## **PROTECTED PASSWORD**

Very convenient application to use for example, when you are traveling allowing you access to your passwords and information related to your travel documents and their digital copies (voucher, insurance, passport, Etc.) always at hand.

## SECURITY TIPS

*The ability to save all your passwords in a safe place allows your employees to store and create complex passwords for each service safely. Secure Password can also help you generate new attack-proof passwords.*
