

File Encryptor

With File Encryptor you can protect the sensitive data archived in your company thanks to military-grade encryption

- ✓ **LOCAL AND NETWORK RESOURCE FILE ENCRYPTION**
- ✓ **ENCRYPTION RULES**
- ✓ **ACTIVITY MONITORING**

Do not change your working habits. File Encryptor protects data on your behalf.

Your archive is now more secure

File Encryptor was designed to meet the need of companies to encrypt and have control of their data across network storage, local disks and other Cloud Providers

1

PROTECT CONFIDENTIAL CORPORATE DOCUMENTS WITHOUT MIGRATING THE DATA

2

OPEN ENCRYPTED FILES THROUGH LOCAL OFFICE APPLICATIONS

3

AUTOMATE THE ENCRYPTION PROCESSES ACCORDING TO YOUR COMPANY'S POLICIES

4

TRACK ALL ACTIVITIES ON FILES AND USER ACCESSES

INSTANT SETUP

You can secure your confidential data right away thanks to a simple step-by-step setup

AUTOMATIC RULES

- Automatically encrypt all files directly in your network resources
- Automatically set classification rules, even imported from third-party softwares (Titus, Boldon James, etc.)

BENEFITS

- Apply BooleBox security standards to your network share
- Your files will always be protected and safe from prying eyes, even if your laptop is stolen or lost
- Automatically synchronize your files protected locally with your BooleBox account
- Available for both CLOUD and ON-PREMISES versions
