- ✓ **ADVANCED ENCRYPTION OF CONTENTS**
- ✓ **AUTOMATIC PROTECTION OF ATTACHMENTS, BASED ON COMPANY POLICIES**
- ✓ **DYNAMIC ACCESS CONTROL**

*Use Microsoft®
Outlook® safely*

Encryption of e-mails in Microsoft® Outlook®

Military-grade encryption and Personal Keys to protect your e-mails

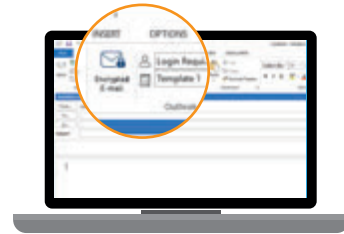

Send encrypted e-mails applying the security Template that best suits the sensitive content of your communication and applying different access modalities for your recipients.

State-of-the-art functionalities, such as Personal Keys, dynamic watermark, Anti Capture and Deter Photo Shots, make your messages impossible to be intercepted or accessed by unauthorized users.

You can also attach documents directly from your secure BooleBox account, without having to save them on your local device.

If you change your mind, you can also modify or revoke the access permissions associated to the message, even after sending it.

Furthermore, thanks to the multi-user management, you can associate and save all your different e-mail accounts to your BooleBox one. In this way, your communication flows will be faster and more secure.

-  **PERSONAL KEYS**
-  **ANTI-CAPTURE & DETER PHOTO SHOTS**
-  **ACTIVITY LOGS**
-  **DYNAMIC WATERMARKS**
-  **SSO LOGIN AND TWO-FACTOR AUTHENTICATION**
-  **E-MAIL ACCESS REVOCABILITY**
